

CELEBRATE GEOGRAPHY AWARENESS WEEK

GET LOST IN MAPPING: FIND YOUR PLACE IN THE WORLD

Join National Geographic in celebrating Geography Awareness Week, November 15-21, 2009. Visit GeographyAwarenessWeek.org for activities, games, lesson plans, and—of course—maps that help put your world in perspective.

MAP YOUR WORLD

Don't like to stay inside the lines? Create your own map masterpiece! Using the blank space below, construct a unique map of whatever you choose. Here are some ideas:

- Think about the route you take to school. Try drawing (and labeling!) buildings, landmarks, and streets that you see along the way.
- Imagine your local park. Can you correctly place the swing sets, benches, trees, or other objects? When you're done, go exploring to see how accurate your map is!
